NEWS RELEASE November 4, 2011

**Sego Resources Announces Completion of Phase II Percussion Drilling.**

**New Zone Found on Cuba IP Anomaly.**

**MM-11-PDH-68 > 10,000 ppm copper and 2,065.5 ppb gold**

**10,000 ppm = 1%**  
**2,000 ppb = 2 grams**

Sego Resources Inc. (“Sego” or the “Company”) is pleased to report that it has recently received rock geochemistry from the Phase II percussion drilling program totalling 1500 samples. A new copper-gold zone has been identified over 18 holes, from PDH-57 to PDH-77. This zone is 200 m x 150 m and is open to the E, NE, SE, and at depth. The new zone lies 300 metres east and 100 metres south of the centre of Phase I percussion drilling (PDH 09,20,21,DDH-19-see news release April 05, 2011). Phase II percussion drill hole 35 also extended 70 metres to the NE the zone identified by the Phase I drilling.

Highlights of the new zone include:

MM-11-PDH-66                      1000 ppm copper = 0.1% copper    100 ppb gold = 0.1 grams/tonne gold

	Cu ppm	Au ppb	Ag ppm

Rock geochemical results and a drill hole location map can be found on our website at [www.segoresources.com](http://www.segoresources.com).

All samples over 1,000 ppm Cu have been sent for fire assay. Hole averages will be released when fire assays are completed.

**Phase II consisted of 43 percussion holes drilled on a 30 m x 30 m grid of 400 m x 450 m.**

**Phase III percussion drilling program is expected to begin within two weeks or as soon as the crew can be mobilized. This will be followed by a diamond drill program in January 2012. The Granby-Cuba Zone is 350 m x 1500 m and is being drilled on a grid basis. Sego Resources is permitted for five years of exploration.**

**Sego Resources Inc. is a mineral exploration company, exploring the Miner Mountain Project, a large scale porphyry copper-gold target northeast of Princeton B.C. Exploration to date, has located zones of surface copper-gold mineralization and drilling has confirmed the presence of significant copper-gold grades at depth. The Miner Mountain Project is 15 kilometres north of Copper Mountain Mining Corporation's former copper producer (closed 1996) that resumed production in August 2011. The Miner Mountain Project is situated within the traditional territory of the Upper Similkameen Indian Band with whom Sego Resources Inc. has a memorandum of understanding which provides a constructive framework for future development and exploration.**

**This News Release was reviewed and approved by V.A. Preto, Ph.D., P.Eng., a Qualified Person under National Instrument 43-101. All samples were tested by Aqua Regia digestion ICP-MS at Acme Labs an accredited laboratory in Vancouver, B.C.**
