Sego Resources Inc. Announces Partnership with British Columbia Geological Survey

Sego Resources (Sego) is pleased to announce that it has signed a Geoscience Partnership Agreement with the British Columbia Geological Survey (BCGS) that contributes to ongoing regional geological studies in the Nicola Arc. The current Partnership will extend for two years and will have Sego providing monetary and technical support to the Survey's Nicola Arc – South field program. Under this agreement two senior geologists from the Geological Survey Branch will complete geological mapping on and around the Miner Mountain Project as part of a larger multi-year regional mapping program aimed at understanding the geology and metallogeny of the region roughly between Princeton and Merritt, BC. The project focuses on the stratigraphy, age and geological setting of the Southern Nicola Group.

Sego's sole project is the Miner Mountain Project a Copper Gold Porphyry Project near Princeton, BC, 15 kilometres north of Copper Mountain Mining Corporation's – Mitsubishi's Copper Mountain Mine. The Miner Mountain Project is situated within the Traditional Territory of the Upper Similkameen Indian Band with whom Sego has an MOU. The Miner Mountain property is 2,056.54 hectares in size.

J. Paul Stevenson, CEO

Sego Resources Inc
